

Versasia Infosoft Pvt. Ltd.
we design your imagination

Our journey

Versasia Infosoft started its operation in the year 2006, with a total of 4 from Ahmedabad, Gujarat, India, with a focus to establish an IT Services Company for World Wide Clients offering ITES and CAD Engineering services. Over the past 16 years we have successfully executed more than 400 of major projects in different sectors including:

Core Engineering Domains

- ▶ Oil and Gas
- ▶ Petrochemicals & Industrial
- ▶ Power Generation and Desalination Plants
- ▶ Water Treatment and Waste Water Treatment Plants
- ▶ Mining

Core ITES Domains

- ▶ Travel and Leisure
- ▶ Pharmacy and Health Care
- ▶ E-commerce and Retails
- ▶ Real Estate and Property
- ▶ Media and Entertainment
- ▶ Banking and Insurance
- ▶ Automobile
- ▶ Banking and finance
- ▶ Import & Export
- ▶ Educations and Training

An Indian Group with Global Existence

Group Strategy:

Around the World With the
Customer

Group Culture:

Determination

Integrity

Professional, Reliable, Trustworthy

Pride

Spirit

Team Work

Services We Offer

Engineering Capabilities

- ▶ Mechanical Engineering
- ▶ Structural Engineering
- ▶ BIM Modelling
- ▶ Piping/Plant Design
- ▶ FEA – Finite Element Analysis
- ▶ Rebar Detailing

ITES Capabilities

- ▶ Portal Development
- ▶ Custom App Development
- ▶ Graphics & Media
- ▶ Microsoft Technologies
- ▶ Open Source Technologies

Engineering Capabilities

Mechanical Engineering:

Versasia Infosoft provides Mechanical Design and Mechanical Drafting services using AutoCAD (DWG, DXF, and PDF), Solidworks, Inventor, Pro-E, etc. We have capability to create new sketches from design data. Using our Mechanical Design and Drafting expertise, we can also create assembly drawings for all types of mechanical assemblies, architectural schematics, structural designs... and then transform them into perfectly accurate multi-layer CAD drawings

- ❖ Mechanical Designing
- ❖ 2D Drafting and detailing
- ❖ 3D Parametric Modeling
- ❖ Part and Assembly Modeling
- ❖ Preparation of production (manufacturing) drawings
- ❖ Parts lists and bill of materials

Engineering Capabilities

Structural Engineering:

Our structural design and drafting service is provided to structural engineers, engineering firms, architects, contractors and steel detailers. We serve worldwide clients and we know code compliance in many countries. We use software like AutoCAD, Tekla, StruCAD for modeling and generating drawings purpose. For projects on which unknown codes or new construction practices should be applied, we have already developed a sophisticated system to learn quickly. To aid in design and production of drawings we have invested in dedicated packages designed for specific industries.

- Boilers
- Civil Foundations
- Pipe Work
- Steel Column, Beam
- Power Station Ductworks
- Petrochemicals
- Platforms / Walkway
- Staircase, Handrail
- Water Treatment
- Sprinkler Systems
- Conveyors, Conveyor Tower
- P&ID Drawings

Piping / Plant Design:

Our distinctive engineering and design capabilities and expertise enable us to provide value-added services when developing piping systems. Using state-of-the-art plant design management software, our engineers and clients work together to develop the piping system design. Clients benefit from our ability to optimize the system's design to achieve a higher quality product.

Using the software like PDS/PDMS and CADWORX and Solidworks for modeling purpose and our engineers performs many engineering and plant design functions:

Finite Element Analysis (FEA)

Engineering analysis using FEA technology has become standard for most manufacturing companies. Undoubtedly FEA has become an influential and adaptable engineering tool in recent years.

Our consulted engineers perform FEA simulation using modern computational tools from world leading suppliers of engineering simulation solutions, such as ANSYS, Cosmos and PV Elite & CAESAR II based on clients' requirements

Rebar Detailing

Asia Infotech is one of the top most companies in the industrial sector specializing in the Rebar Detailing jobs to prepare special drawings for the construction sites. The expert team members of the designer group prepare the design drawings that gradually develop the required strengths by applying rebar size, spacing, lap of sheet and location.

Asia Infotech has been serving clients with the use of latest Rebar detailing software which is fast, reduces cost and helps to save time. It also standardizes their products and processes and identifies the alternative technical and construction sites. Our company offer high quality **Rebar Detailing** services globally. The **Rebar Detailing** services include a range of services such as rebar concrete shop drawings, bar bending schedules, retaining wall detailing a, rebar placement drawings and many others. Moreover we are probably one of the few companies who have diversified work experiences in **Rebar Detailing** in order to suit the different industry practices.

A Message from the team

You can save huge amounts of money and stress and take a liberated step by using outsourced resources that can connect to your business over the internet—simple as that!

We hope that you will consider business relationship worth experiencing and will privilege us with an opportunity to serve you.

We are keen to hear from you!!!

Best Regards,
Team Versatile | India
